

Enterprise LMS Specification

Name: Kirby Learning Academy

Logo: kirby_learning_academy_logo.png

favicon: favicon.ico

Branding/appearance: in the style of www.kirbycorp.com

Suggested Basic Features

1. Core Learning Management

- Learning paths / curricula
- Certification and recertification management
- Role-based training assignments (by job, department, location)

2. User & Organization Management

- Integration with HRIS / Active Directory
- Role-based access control (RBAC)
- Contractor / external user access segregation

3. Assessment & Competency Tracking

- Skills matrix and competency tracking
- Gap analysis reporting (required vs. achieved skills)

4. Compliance & Certification (Critical for Industrial / Marine / Energy)

- Mandatory training tracking (OSHA, USCG, environmental, safety)
- Expiration alerts and renewal workflows
- Audit-ready reporting and logs
- Digital sign-off / attestation records
- Regulatory reporting exports

5. Content Management

- Version control and revision history
- Metadata tagging and searchability
- Content libraries (technical standards, SOPs, manuals)
- Multi-language support

6. Delivery Modalities

- Self-paced eLearning (CBT)

7. Reporting & Analytics

- Training completion dashboards
- Compliance status by site / business unit
- User progress tracking

- Course effectiveness metrics

8. Automation & Workflow

- Automated course assignment triggers (hire date, role change)
- Learning reminders and notifications
- Recurrent training scheduling (annual, quarterly)

9. Integration & Interoperability

- Single Sign-On (SSO)
- Data export for compliance audits

10. User Experience

- Personalized student and admin dashboards
- Progress tracking and visual indicators
- Searchable course catalog

11. Engagement & Social Learning (Optional but Valuable)

- Discussion forums / Q&A
- Peer feedback and ratings
- Certificates, Badges, and gamification
- Leaderboards (optional—depends on culture fit)
- Knowledge-sharing communities

12. Enterprise-Scale Features

- Multi-tenant support (for multiple business units or clients)
- Global compliance management
- High availability / cloud scalability
- Data governance and audit logs
